

Education makes the youth,  
the youth make the future.

**What is your priority for  
tomorrow !?**

We do not have enough money

And because of this .....

It's too less teacher and material !

Too less teachers,

But

Too many pupils !!

So many people  
in the class  
make the teachers  
lose control !

The pupils who want  
to learn something  
cannot understand anything  
because of the loud  
atmosphere

The consequences  
of these problems  
is a lack of education

**NOW**, imagine we  
have more money for  
education...

And so,

-more teachers,

-more schools,

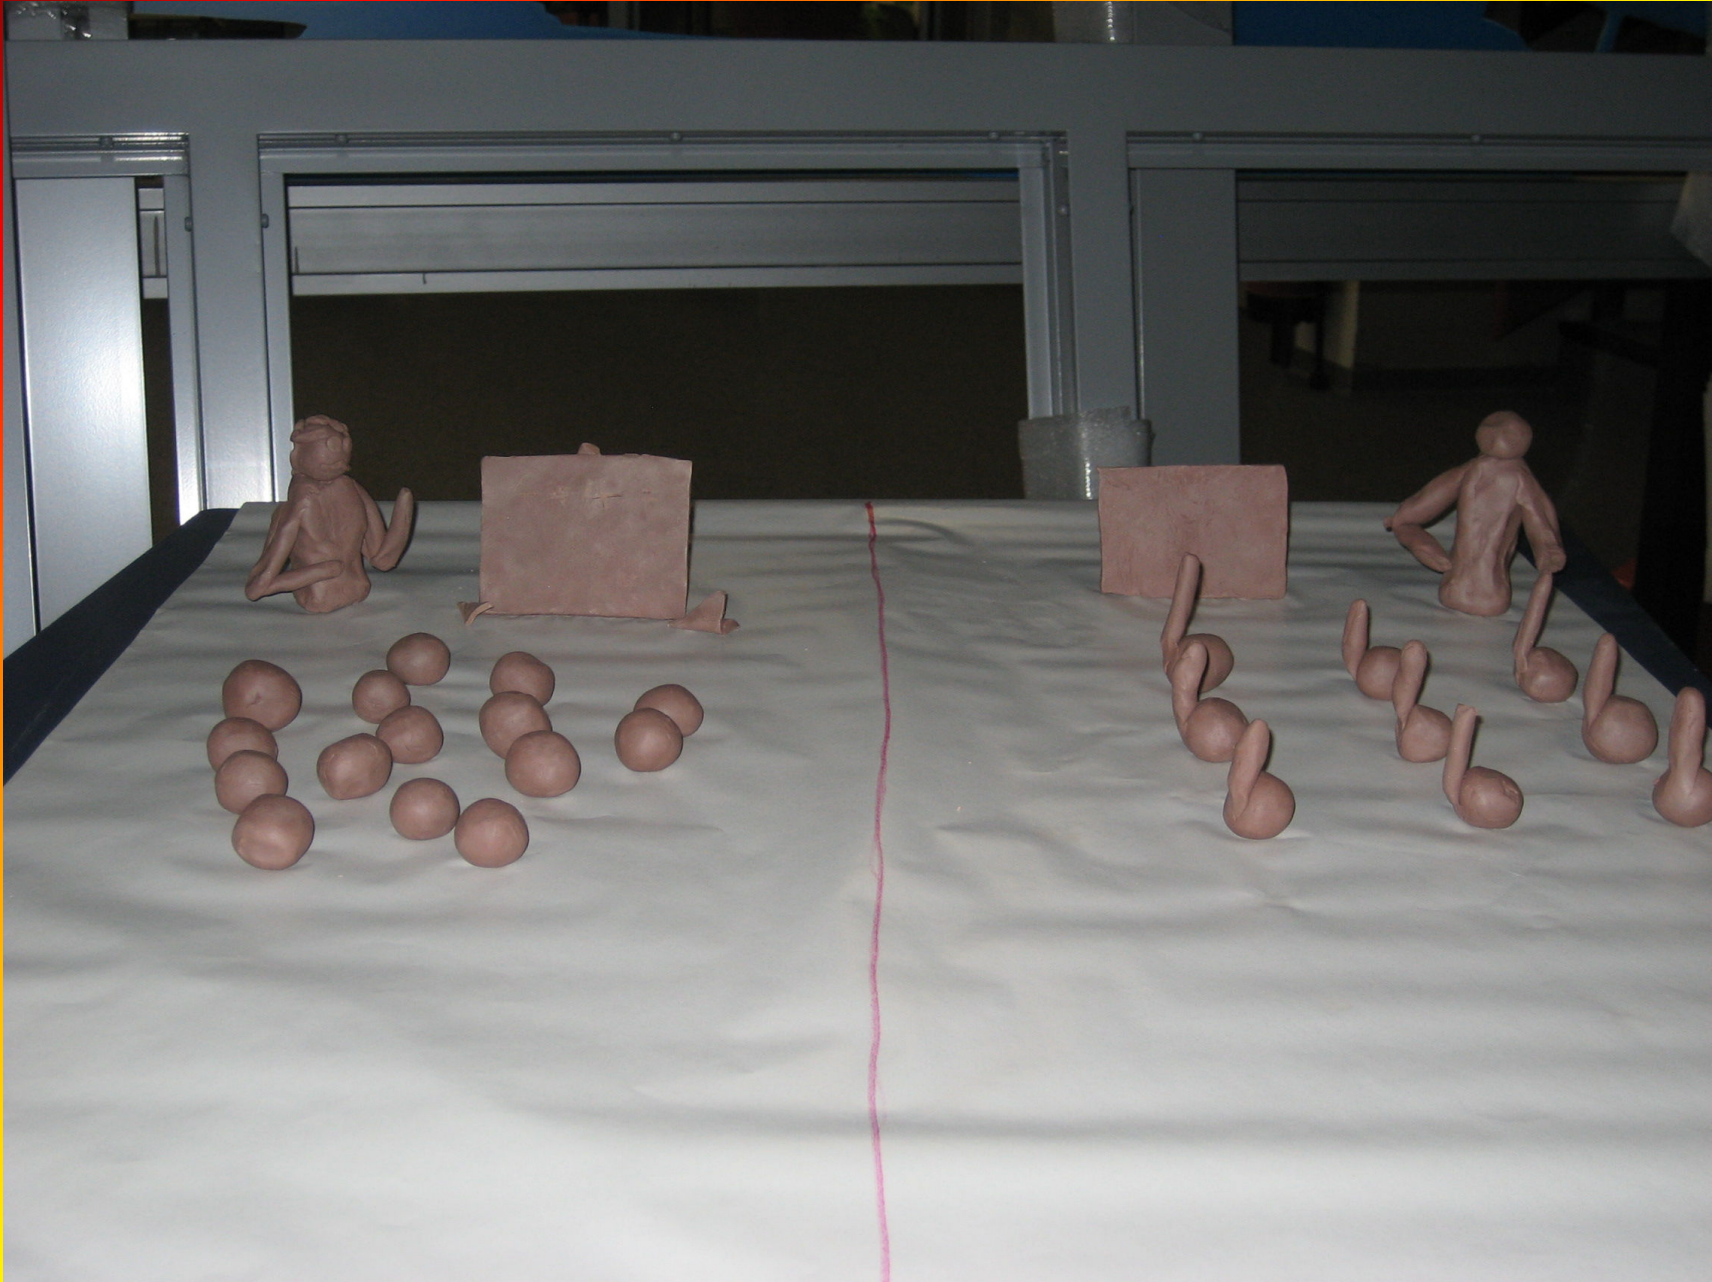

-more material !

That means,  
the possibility  
to have *smaller class*  
and *more fun in*  
*lesson.*

Teachers can have  
better relationships  
with their pupils.

We think that in this better  
atmosphere,  
pupils will really love to go to  
school.

Is it not the best conditions to  
learn ?
